

JEA Smart template documentation

JEA Smart is a real estate template working with Joomla 2.5 or 3.x and fully compatible with JEA ([Joomla Estate Agency](#)). Its main features are :

- HTML5
- Responsive design
- Left To Right and Right To Left language orientation
- Drop-down menu with slide effect
- Customizable themes
- Layout on 960 grid System
- Uses Mootools only for javascript (Natively included in Joomla!)

Browser support :

- IE6 IE7 IE8 IE9
- Opera
- Safari
- Firefox

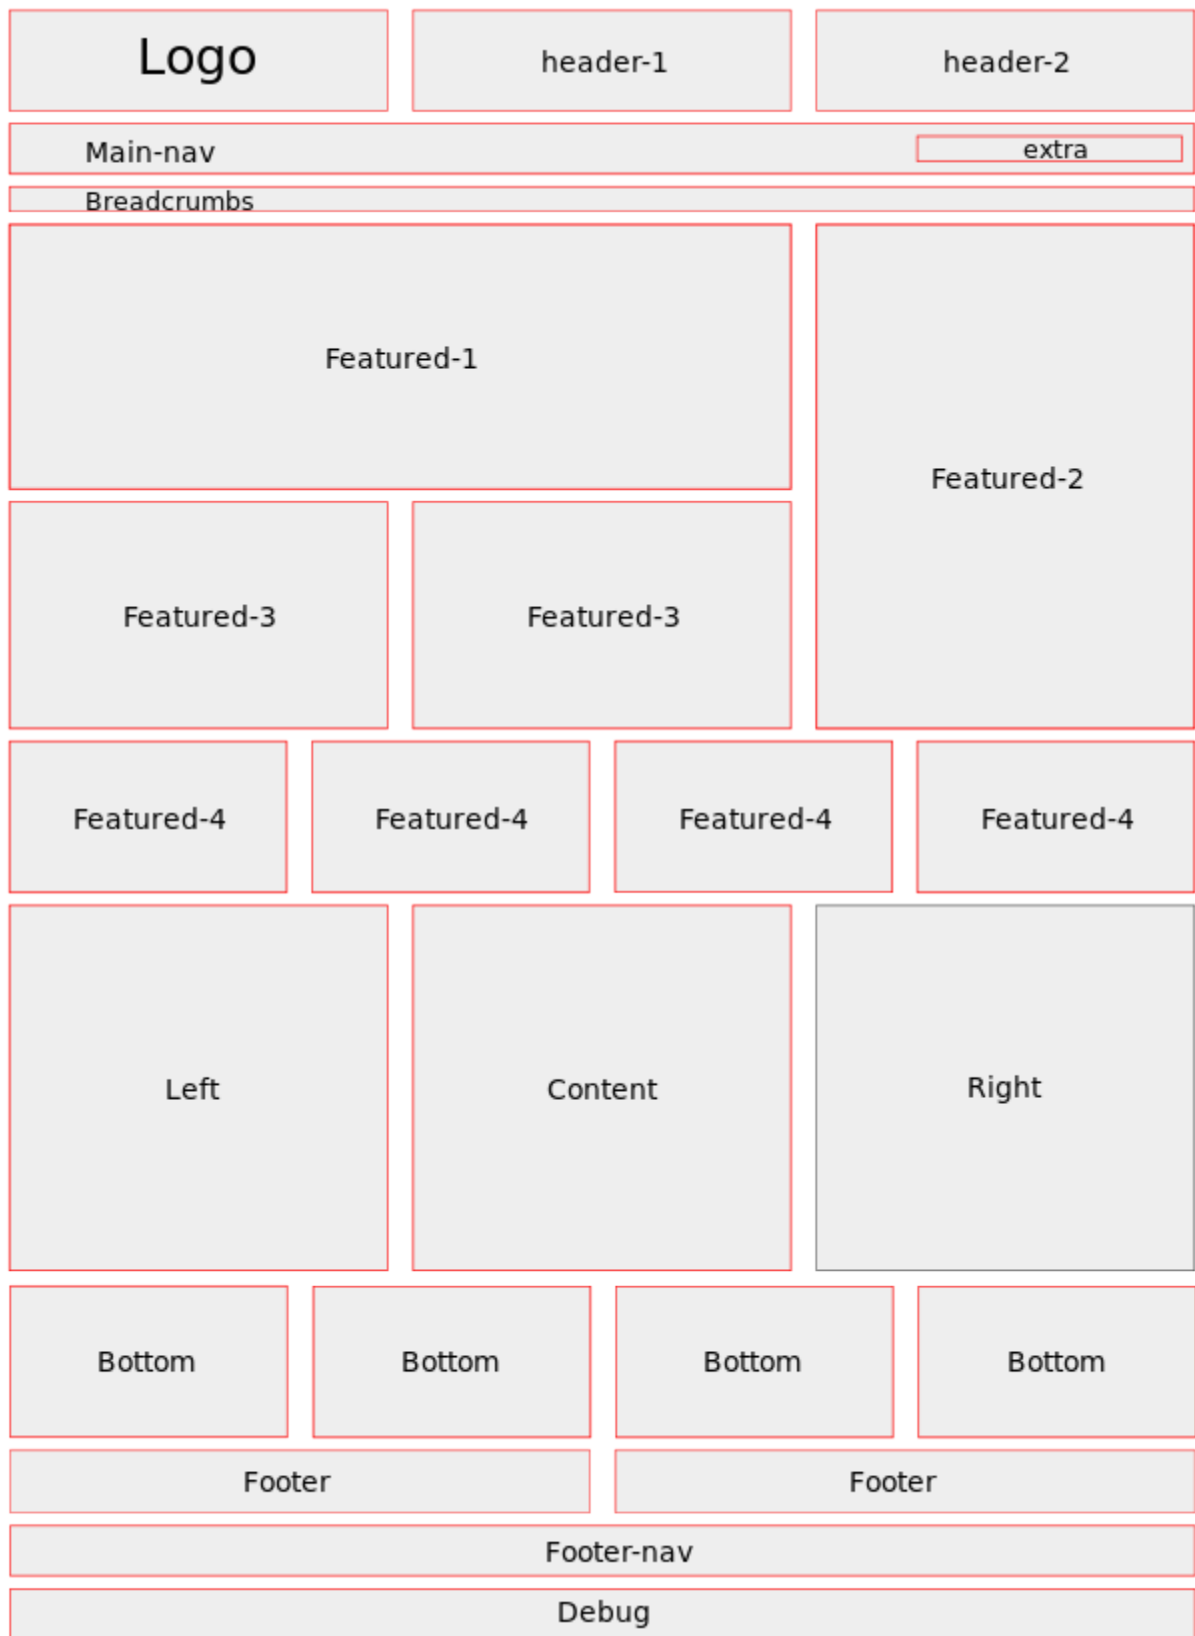

Installation

- From the backend of your Joomla site (administration) select Extensions → Install/Uninstall.
- Click the Browse button and select the template package (tpl_jea_smart.zip) on your local machine.
- Click the Upload File & Install button.
- Once the template installed, from the backend go to Extensions → Template Manager
- Set JEA smart as default template
- Configure the template to add your Logo, a description and choose a theme

Layout and template positions

Template positions are used in the backend module manager to choose where your modules will be displayed in your template.

You will see below the layout for these positions. *Logo* and *content* are not module positions. *Logo* is defined in the template configuration while *content* is the component output.

For web designers

All template images could be customized using SVG files in the *design* directory. To edit SVG, use

Adobe Illustrator or Inkscape (Free software).

You can also create your own theme simply by adding a new stylesheet in the *css/themes* directory. Then, to choose your theme, go to the template configuration from the backend.

License

Mixed :
